

Usage Guidelines for Retirement Plan Consultants LLC Content

Client Ready

When a document is marked "Client Ready," you can make it available to your clients or prospects as is or you can adapt the content for use with clients or prospects. We consider the material appropriate for distribution to individual investors. This is non-branded content relating to general investments topics that is intended to educate clients or prospects.

Customizable

When a document is marked "Customizable," you can customize the document with your firm or plan information and make it available to your clients or prospects or you can adapt the content for use with clients or prospects. We consider the material appropriate for distribution to individual investors OR plan sponsors once it has been customized by you. This is non-branded content relating to general investments topics that is intended to educate clients or prospects.

Advisor Use Only

When a document is marked "Advisor Use," the content is developed for investment professionals including, financial advisors and consultants of RPC. These materials have not been written with a general audience in mind. They should never be transmitted to individual investors, however, you may wish to incorporate ideas or concepts into your own marketing and servicing material. That incorporation should be reviewed by your own compliance process.

Often there is material that advisors wish to quote. The quoted material should be presented in context, with similar footnotes and appropriate citation, and should be carefully reviewed by your internal compliance process.

Regarding "Client Ready", "Advisor Use Only" and "Customizable"

Retirement Plan Consultants does not take responsibility for the enclosed materials in regards to compliance with the Securities and Exchange Commission on your state's rules and regulations. We have prepared information from sources that we deem reliable. The advisor and their investment company will take responsibility for the information used in their marketing materials.
